OUTCOMES-BASED COURSE SYLLABUS

COURSE INFORMATION					
Course Code	COMP 017	Course Title	Multimedia	Course Credit	3 Units/5 Hours
Course Description		The course introduces to the student the fundamental concepts, principles, and practices of Multimedia development, and tools that shall enable to develop it. Specific topics include an introduction to Multimedia, Digital Design, Digital Music Creation, Basic Filmmaking, Basic Photography and Multimedia development. This course shall train students in understanding the principles, concepts, and practices in building a Multimedia System and shall aid the student to understand how this is accomplished and use each technology properly. It shall introduce different software for the development of Multimedia Systems The goal of this course is to introduce the fundamental networking concepts and technologies. Students are expected to learn and put into practice Multimedia principles and concepts by creatively developing individual media and “mix” it altogether to develop a relevant Multimedia System. At the end of the term, students shall understand the fundamental concepts of Multimedia, how it works, the people involved, and its different types and approaches. The students shall also understand the concept of various authoring tools. Students are required to present their Multimedia title in a fun learning experience.			
Pre-Requisites		N/A		Co-Requisites	N/A
VISION		A leading comprehensive Polytechnic University in Asia.			
MISSION		Advance an inclusive, equitable, and globally relevant polytechnic education towards national development.			

PUP A. Mabini Campus, Anonas Street, Sta. Mesa, Manila 1016

THE COUNTRY’S 1st POLYTECHNICU

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE VICE PRESIDENT FOR ACADEMIC AFFAIRS
College of Computer and Information Sciences (CCIS)
Department of Information Technology

QUALITY POLICY STATEMENT	The Polytechnic University of the Philippines commits to provide inclusive and equitable quality education and promote lifelong learning opportunities for human advancement and social transformation through re-engineered polytechnic academic programs. Toward this end, we, the members of the PUP Community will vigorously and steadfastly endeavor to continuously improve the standard of university services to the satisfaction of our clients through the adoption and continuous review of our Quality Management System.
INSTITUTIONAL LEARNING OUTCOMES (ILO)	As a polytechnic state university, PUP shall develop its students to possess: 1. Critical and Creative Thinking. Graduates use their rational and reflective thinking as well as innovative abilities to life situations in order to push boundaries, realize possibilities, and deepen their interdisciplinary, multidisciplinary, and/or transdisciplinary understanding of the world. 2. Effective Communication. Graduates apply the four macro skills in communication (reading, writing, listening, and speaking), through conventional and digital means, and are able to use these skills in solving problems, making decisions, and articulating thoughts when engaging with people in various circumstances. 3. Strong Service Orientation. Graduates exemplify strong commitment to service excellence for the people, the clientele, industry and other sectors. 4. Adept and Responsible Use or Development of Technology. Graduates demonstrate optimized and responsible use of state-of-the-art technologies of their profession. They possess digital learning abilities, including technical, numerical, and/or technopreneurial skills. 5. Passion for Lifelong Learning. Graduates perform and function in society by taking responsibility in their quest for further improvement through lifelong learning. 6. Leadership and Organizational Skills. Graduates assume leadership roles and become leading professionals in their respective disciplines by equipping them with appropriate organizational skills. 7. Personal and Professional Ethics. Graduates manifest integrity and adherence to moral and ethical principles in their personal and professional circumstances. 8. Resilience and Agility. Graduates demonstrate flexibility and the growth mindset to adapt and thrive in the volatile, uncertain, complex and ambiguous (VUCA) environment. 9. National and Global Responsiveness. Graduates exhibit a deep sense of nationalism as it complements the need to live as part of the global community where diversity is respected. They promote and fulfill various advocacies for human and social development.

THE COUNTRY'S 1st POLYTECHNICU

COLLEGE GOALS	The college goals are as follows: 1. Quality IT education relevant and responsive to the changing needs of the industry and society. 2. Strong linkages with industry and other research and development institutions. 3. Strong outreach and extension programs. 4. Highly employable graduates. 5. Innovative systems and researches with greater reliance on technology. 6. Highest degree of commitment and professionalism among administrators, faculty, staff, and students.									
PROGRAM LEARNING OUTCOMES (PLO)	Based on CMO No. _____, Series of _____	Alignment to ILOs								
		1	2	3	4	5	6	7	8	9
	1)Apply knowledge of computing, science, and mathematics appropriate to the discipline.	✓			✓					
	2) Communicate effectively with the computing community and with society at large about complex computing activities through logical writing, presentations, and clear instructions.	✓			✓					
	3) Utilize best practice and standard in different applications.	✓			✓					
	4)Analyze complex problems and identify and define the computing requirements appropriate to its solution.	✓		✓	✓					✓

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES
OFFICE OF THE VICE PRESIDENT FOR ACADEMIC AFFAIRS
College of Computer and Information Sciences (CCIS)
Department of Information Technology

	5) Recognize the need for and engage in planning self-learning and improving performance as a foundation for continuing professional development.		✓	✓			✓		✓	
	6) Function effectively as a member or leader of a development team recognizing the different roles within a team to accomplish a common goal.		✓							
	7) Explain professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology.			✓				✓		✓
	8) Identify and analyze user needs and take them into account in the selection, creation, evaluation and administration of computer-based systems.				✓	✓			✓	
	9) Analyze the local and global impact of computing information technology on individuals organizations, and society.	✓								✓
PERFORMANCE INDICATORS (PI)	Based on CMO No. _____, Series of _____	Alignment to PLOs								
		1	2	3	4	5	6	7	8	
	• Simplify equations using various methods for logic simplifications. • Design, implement, test and debug a program, based on a given specification	✓								
	• Complete and successfully defend a thesis in line with the discipline. • Design and develop a computing solution using object-oriented approach • Implement solutions to circuit design problems using various logical gate functions.

	Design a database based on user requirements using a widely used modeling notation		✓						
	- Design an overall architecture of the system and justify its appropriateness - Identify the strengths and weaknesses associated with different approaches to security. - Describe the set of controls and processes intended to protect information and information systems			✓					
	- Develop appropriate user interfaces for domain specific applications. - Evaluate how system and infrastructure components are organized into solutions in different environments.				✓				
	- Discuss with team members different software methodologies and techniques and identify best solutions for implementation. - Present a proposed solution in class or in a public forum - Justify the proposed solutions effectively through the use of scientific methodologies and document the results properly. - Analyze solutions employed by organizations to address different computing issues.					✓		✓	
	- Immerse/expose in an actual working environment in industry. - Propose an ethical and feasible software solution to the identified research problem that employs new designs, tools, and methodologies. - Evaluate professional, ethical and social issues of computing decisions.

									✓	
	• Create a report on a conducted independent learning activity. • Identify the relevant/legitimate sources of technology based information and utilize them for continuous learning									✓
COURSE LEARNING OUTCOMES (CLOs)	At the end of this course, the students are expected to: 1. To equip the students with the skills in basic photography and videography with image post-processing and video editing. 2. To work in a team to improve design, development, presentation, and critical thinking. 3. To enhance the student's creativity, presentation, communication skills and effective delivery of message using a mix of various media. 4. To introduce to the students the many rewards of this course when applied to graphic design industry.	Alignment to PLOs

6 & 7	- Post Processing Software - Workflow of Post Processing - Apply Raw Vs. Jpeg format in post processing - The importance of basic adjustments of photo like Highlights, Shadows, Curves, White, Black, Clarity, Texture and Sharpening.		Post Processing or Image Editing a. Introduction of any Post Processing Application Program b. Overview of Adobe Photoshop, Snapseed or any post processing Application Program. c. Color Wheel	Lecture Discussion Demonstration	Virtual Meeting Lecture Discussion Demonstration	Video Lessons/Tutorials Instructional Materials	Post Processing of Image captured in actual photo shoot
8	- Multiple Exposure in Photography with editing using masking. - Presentation of post processed outputs/photos - Meet the Workspace - Understand Layers (Type of Layers, Creating, Renaming, Deleting) - Make Basic Composite and saving the file. - Compositing		Multiple Exposure a. More on Layers Panel	Lecture Discussion Demonstration	Virtual Meeting Lecture Discussion Demonstration	Video Lessons/Tutorials Instructional Materials	Actual photoshoot of multiple exposure and image editing and presentation of their creative output
9	MIDTERM EXAMINATION						
10 & 11	Understand the importance of basic filmmaking and advantages of using DSLR or Smart Mobile Phone in basic filmmaking		Network Introduction to Multimedia a. An Overview of Multimedia b. People in Multimedia c. Multimedia Architectures d. Basic Filmmaking	Lecture Discussion Demonstration	Virtual Meeting Lecture Discussion Demonstration	Video Lessons/Tutorials Instructional Materials	- Assignment - Group Video Filmmaking Recording and Presentation

CLASSROOM POLICIES (to be filled out by the assigned faculty)	
FACE-TO-FACE DELIVERY	FLEXIBLE TEACHING AND LEARNING ACTIVITIES (FLTAs)
General classroom guidelines 1. Students shall attend set contact schedule ready with all the materials and outputs required to be read, discussed, and/or submitted. Students should have also read required texts at least once before its scheduled discussion. 2. PLAGIARISM SHALL NOT BE TOLERATED. The following penalties will be strictly implemented to outputs proven to contain plagiarized words, phrases, clauses, sentences, paragraphs, or ideas: First offense – automatic failure in the output; Second offense – automatic failure in the output + letter from parent/s/guardian/s that acknowledges the offense; Third offense – automatic failure in the course. 3. Requirements shall be submitted on time. However, in special cases when students fail to submit requirements for some acceptable reasons, submissions will be subjected to deductions of no less than 0.25 per day. 4. Students who have any form of disability must inform the course instructor immediately so that alternative arrangements may be immediately considered. 5. All students are expected to read and strictly observe the PUP Student Code of Conduct https://drive.google.com/file/d/0B1BuDAuN0r8SX1BWx2N_SN3FURzg/view?resourcekey=0-oi8lUy9PCFysh0FDyL5jpw Guidelines for the face-to-face delivery: 1. Strictly observe the minimum health protocols set by the university. 2. Check your schedule on the class Facebook page before going to school. 3. Be mindful of your classmates and teacher's time. Be alert, constructive, and responsive.	Synchronous sessions 1. Check your device ahead of your scheduled synchronous meeting (camera, microphone, keyboard, speakers, etc.) 2. Attend the synchronous class on time. 3. Be ready to turn on your microphone and camera anytime. 4. Choose a comfortable space to attend the online class. 5. Click the 'raise hand' button and wait to be acknowledged by the teacher(s) before unmuting your microphone. 6. Do not abuse the chat box. 7. Read the assigned materials before attending the class. 8. Be mindful of your classmates and teacher's time. Be alert, constructive, and responsive. Asynchronous sessions 1. Study the sections and functions of the assigned learning management system (LMS) ahead of time. 2. Check the expected submission/turn in schedule at all times. For some timed activities, late submission may cause deductions to your grades. For group activities, discuss the best time and platform to discuss the assignment of tasks with your groupmates. 3. Ask for help from your teacher(s) and classmates when necessary. (Follow the rules on sending an effective emailss to your teacher. A separate discussion shall be allotted for this.)
